

CALL FOR PAPERS

is now accepting papers from graduate and undergraduate students on the epistemological, societal, ethical, and legal implications of nanotechnology (and its convergence with biotechnology, information technology, and cognitive science) for its next issue.

Deadline for submissions: Tuesday, December 18, 2007

Articles, reviews, and papers of any length will be considered.

You can check out *Minus Nine* at:

<http://schc.sc.edu/minus9/>

Possible areas for papers include (but are not limited to):

- Overviews of scientific developments on the nanoscale
- General summaries of research objectives and trends
- Current understanding of why the nanoscale is so unique

Please email submissions as attachments to the editors (nanoeditors@gmail.com) and include the author's name, school, area of study, advisor (if applicable), title of the paper, brief abstract, and a short bio. We ask that all submissions please include a bibliography for all references and be formatted as Word documents.

Questions may be directed to: nanoeditors@gmail.com
